

Sex modelling in LARP

Just dry theory

Viatcheslav Rojkov

Diana Trubetskaya

What's the point of modeling?

- Demography and inheritance LARPs (especially in medieval)
- Entourage – to make the game more beautiful
- Bordello (public house) – place for cultural rest
- Assaults – psychological pressure
- Courtly behavior
- Virginity
- A lot of fun

Why we need to model?

- It's part of play
- To prevent misunderstanding with jealous real-life spouses or under-age
- To set up borders of play and protect internal space

Demography

Format for Russian games – 2-3 days in the forest. Death from wars, illness, old age can be modeled. Dead character goes to Land of Dead for 2-12 hours. If he was married, he comes back sooner, maybe as his own child and inherits property and power from his parents. Also sometimes marriage reduces time in Land of Dead.

Demography models

- “Official marriage” and consummation
- Interaction with master
- Any sex modeling is acceptable to make bastards
- Process of growing-up

Entourage

- Marriage is a celebration and ceremony

Bordello

Medieval roleplay requires points for the rest and bordello is a part of medieval reality.

Sex modelling :

- Massage

- Dances

(usually arabic)

- Smth else

Assaults

Psychological pressure from occupants or robbers. Suitable for war games.

Usual model:

- Hold victim for 1 minute.

Exotic assaults:

- Press-ups 50 times.
- Any body contact (e.g. hand in hand) and singing lyric songs.

Courtly behavior

How to show-off as a libertine? Support by model.

- Find safety pins on a partner's body and put on a tie to demonstrate
- Body art – group or individual

Especially for Lovelace or Sultan

- Squatting with girl on shoulders

Virginity

Can demonstrate sanctity or a reason to interact with “angry relatives”

Model:

- Bandage on a leg.

Can be “lost somewhere”.

Some fun models

- Pregnancy – balloon under dress for few hours

- Pencil and sharpener

- Combing

Pat-a-cake

Thanx
